

Disease Management

Founded in 1987, Family Physicians Group was created to ensure you receive the most comprehensive, preventative and proactive health care services from a team of experts.

Our health care model includes you, your family, a primary care physician, hospitalist, case manager and social worker and results in a personalized care plan that focuses on your lifestyle and unique medical needs.

Family Physicians Group

Preventative and Proactive

Family Physicians Group

"YOUR PATIENT-CENTERED MEDICAL HOME"

The Family Physicians Group Difference

Family Physicians Group is Central Florida's leading patient-centered medical home. With more than 20 locations to serve you, we offer comprehensive care and services to help you manage your health and maintain your well being.

Our disease management program is designed to help you identify and control chronic illnesses including:

Congestive Heart Failure (CHF)

- Free CardioCom® Biometric Measurement System
- Quarterly treatment reports
- Outreach calls to monitor your progress

Chronic Obstructive Pulmonary Disease (COPD)

- Identify Continuous Positive Airway Pressure (CPAP) and Bi-level Positive Airway Pressure (BiPAP)
- Assist homebound COPD patients requiring oxygen
- Gold Standard staging based on PFTs
- Outreach calls to monitor your progress

End-Stage Renal Disease (ESRD)

- Procrit clinics
- Quality Measures
- Identify Champion Dialysis Units
- Achieve 60% AV Fistula Rate
- Outreach calls to monitor your progress

Diabetes Mellitus

- Our physicians are recognized by the Diabetes Physician Recognition Program (DPRP) and the National Committee for Quality Assurance (NCQA)
- Free GlucoCom® Monitoring Program
- Identify non-compliant patients with a Glycohemoglobin measurement above 9.0
- Diabetic education and management
- Outreach calls to monitor your progress

FPG's Disease Management Program

- Addresses your unique medical needs via a personalized, proactive care plan.
- Off-sets the cost of prescription drugs and medical devices.
- Emphasizes preventative treatments for the management of chronic conditions.
- Features an education component that highlights wellness and care coordination.
- Integrates innovative care models to improve your health and enhance your life.
- Promotes high-quality care to ensure you are satisfied with your progress.
