

Founded in 1987, Family Physicians Group was created to ensure you receive the most comprehensive, preventative and proactive health care services from a team of experts.

Our health care model includes you, your family, a primary care physician, hospitalist, case manager and social worker and results in a personalized care plan that focuses on your lifestyle and unique medical needs.

Family Physicians Group

"YOUR PATIENT-CENTERED MEDICAL HOME"

The Family Physicians Group Difference

Family Physicians Group is Central Florida's leading patient-centered medical home. With more than 20 locations to serve you, we offer comprehensive care and services to help you manage your health and maintain your well being.

Mental health is a sensitive subject. And the medical team at Family Physicians Group is committed to providing compassionate care to patients who face emotional and/or behavioral challenges.

Identifying a Disorder

Signs and symptoms* may include:

Substance Abuse

- Failure to attend school/work
- Legal issues
- Challenges with friends/family resulting from frequent intoxication
- Increased alcohol tolerance
- Withdrawal symptoms
- Unsuccessful attempts to decrease or control use

Bipolar Disorder

- Feelings of sadness, hopelessness or despair
- Euphoria
- Appetite and sleep deprivation
- Grandiosity
- Loss of interest
- Pressured speech
- Poor concentration and judgment

Schizophrenia

- Hallucinations/delusions
- Catatonic posturing
- Affective flattening
- Disorganized thinking
- Thought blocking
- Loss of pleasure with life
- Disorganized/inappropriate behavior

Depression

- Feelings of sadness/tension
- Loss of interest in enjoyable activities
- Reduced energy
- Sleep deprivation
- Loss of appetite
- Thoughts of suicide or death

* Only a doctor can diagnose these disorders. Please consult your physician for assistance.

Offering Compassionate Care in a Safe Environment

Our mental health experts are skilled in identifying and managing the effects of these disorders. In partnership with you and your family, our clinicians develop a plan to help you cope with your symptoms and enhance your life.

Our Patient-Centered Medical Home model includes individual appointments, personalized pharmacy services and non-emergency transportation assistance.
