

Founded in 1987, Family Physicians Group was created to ensure you receive the most comprehensive, preventative and proactive health care services from a team of experts.

Our health care model includes you, your family, a primary care physician, hospitalist, case manager and social worker and results in a personalized care plan that focuses on your lifestyle and unique medical needs.

Hospital & Nursing Home Care

Continuity of Care

Family Physicians Group
"YOUR PATIENT-CENTERED MEDICAL HOME"

The Family Physicians Group Difference

Family Physicians Group is Central Florida's leading patient-centered medical home. With more than 20 locations to serve you, we offer comprehensive care and services to help you manage your health and maintain your well being.

Our hospitalist group, Physicians Hospitalist Partners (PHP), effectively monitors your care at the hospital and nursing home level. With access to Central Florida's major hospitals, our physicians are committed to providing you the best quality care from the point of admission, through the course of your stay, at discharge and beyond.

Physicians Hospitalist Partners

Created in 2001, the PHP model ensures you receive superior service during your stay in acute care settings. Our team of expert hospitalists delivers an efficient health care plan that optimizes personal attention and enhances your well being.

And our comprehensive services do not stop upon discharge. PHP physicians also manage your care through the skilled nursing/rehabilitation phase and into your home. They work closely with your nurses, case manager, social worker and family to ensure you experience an effective, comfortable recovery.

Physicians Hospitalist Partners

Philosophy of Care

- Assess, admit and treat acute health problems
- Manage chronic care treatments
- Utilize a team approach
- Identify and manage psychological and social aspects
- Respect patient's dignity autonomy, cultural and spiritual beliefs
- Promote wellness through education, care planning and management
- Promote optimism and hope
- Listen and communicate effectively
